

MULTIGREEN II®

Chelated Micronutrients

Greens
& Tees

Fairways

Commercial & Residential
Lawn Care

Sports Fields
& Parks

Ornamentals
& Nurseries

Multigreen II® increases plant vigor. Within a few hours after application of this water soluble liquid blend, the plant color improves. It is recommended for greens, tees, fairways, commercial and residential lawncare, sports fields, parks, ornamentals and nurseries.

Other benefits include:

- Tank mix compatible with most products
- Chelated to prevent fixation in the soil
- Low/non-staining
- Can mask the discoloration from application of growth regulators
- Long-lasting

Features 4 Chelated Micronutrients

- 5% Iron (Fe)
- 0.5% Manganese (Mn)
- 0.05% Molybdenum (Mo)
- 0.5% Zinc (Zn)

Best when applied spring through fall

Available in 2 x 2.5 gallon cases
and 30, 55 and 250 gallon drums

MULTIGREEN II® Applications

GREENS & TEES

- On greens, use 3 to 5 oz. per 1000 sq. ft. bi-weekly for color and quality. Use early-spring through early-summer and early-fall through early-winter. During summer months use MaxiGreen II.®
- On tees to maintain color and quality, apply 1.5 to 3 oz. per 1000 sq. ft. bi-weekly to monthly.
- On tees to aid recovery and treat stressed areas, apply 3 oz. per 1000 sq. ft. bi-weekly with Muscle,® Regal Crown® and Regal® liquid fertilizers.

FAIRWAYS

- During spring green up, apply 1.5 to 3 oz. per 1000 sq. ft. when turf begins active growth to improve early-season color and quality. Repeat applications monthly during the growing season.
- Apply with Solace and other growth regulators at 1.5 to 3 oz. per 1000 sq. ft. to mask bronzing.
- During heavy play and prior to tournaments apply 3 oz. per 1000 sq. ft. for improved color and quality.

COMMERCIAL & RESIDENTIAL LAWN CARE

- For warm season grasses, apply 2 to 3 oz. per 1000 sq. ft. monthly during spring and fall. Use MaxiGreen II during summer months.
- On cool season grasses, apply 2 to 3 oz. per 1000 sq. ft. during warm months to enhance color. MultiGreen II will not increase Rhizoctonia pressure.
- Excellent tank mix partner with fungicides, insecticides and growth regulators to mask bronzing.
- For big events, apply 2 to 3 oz. per 1000 sq. ft. prior to the event for optimal turf color and quality.

SPORTS FIELDS & PARKS

- For warm season grasses, apply 2 to 3 oz. per 1000 sq. ft. monthly during spring and fall. Use MaxiGreen II during summer months.
- On cool season grasses, apply 2 to 3 oz. per 1000 sq. ft. during warm months to enhance color. MultiGreen II has no nitrogen and will not increase Rhizoctonia pressure.
- Excellent tank mix partner with fungicides, insecticides and growth regulators to mask bronzing.
- For big events, apply 2 to 3 oz. per 1000 sq. ft. prior to the event for optimal turf color and quality.

ORNAMENTALS & NURSERIES

- Use in **Regal Grow Program**. Apply 1 gallon of MultiGreen II in 100 gallons of water. Use alone or in combination with Regal Crown, Muscle, Bridle,® Fenox,® ConSyst,® SyStar® & Resyst.®
- To green up ornamentals, apply 1 gallon of MultiGreen II in 100 gallons of water, until plants are drenched.

These are general recommendations. For specific directions on product usage and rates, timing and mixing, please refer to the MultiGreen II product labels at regalchem.com.
