PLANT RESPONSE

### Liquid Nutrition for Healthy Plants™

Greens  
& Tees

Fairways

Commercial & Residential  
Lawn Care

Sports Fields  
& Parks

Ornamentals  
& Nurseries

**Nitrogen & potassium powered by PlantResponse technology. PlantResponse is an osmolyte which contributes to increased plant tolerance to abiotic stresses such as heat, drought, and salinity. PlantResponse technology improves chlorophyll content and photochemical efficiency, mitigates cell damage from abiotic stress, and improves overall plant quality.**

#### Recommended Rates

For best results apply as a foliar spray in sufficient water for thorough coverage (typically 1 to 2 gallons per 1,000 sq. ft.). When applying higher rates of products, and for maximum plant uptake and safety of all foliar fertility applications, it is best to water product to the soil surface before the warmest part of the day.

*For best results make initial applications prior to plant stress situations:*

**Greens & Tees:** 5 Gal./A initial application, followed by 2.5 Gal./A every 14 days, or 5 Gal./A every 28 days.

**Fairways & Other Turf:** 5 Gal./A initial application, followed by 2.5 Gal./A every 14 days, or 5 Gal./A every 28 days.

**Trees & Ornamentals:** 1-8 qts. per 100 gal. water as soil drench as necessary.

#### Guaranteed Analysis

Total Nitrogen (N) ..... 3%

3.00% Urea Nitrogen

Soluble Potash (K<sub>2</sub>O) ..... 7%

DERIVED FROM: Urea, Potassium Acetate
